

A Managed IT Service Provider With an Emphasis on Service

For more than 20 years Sunco Communication and Installation has earned its reputation as our customer's most trusted systems integrator. From telecommunications to connectivity, our focus on becoming a strategic partner to our customers is second to none. With our addition of leading IT provider Isosceles Business Systems, that hands-on, collaborative and dedicated approach is available in a broader range of business-critical ways with **Sunco Managed IT Services**.

Tailored Services Designed to Meet Your Needs

We know that no two businesses are alike. So you shouldn't settle for a one-size-fits-all approach to managed services.

Sunco specializes in designing tailored, flexible services with predictable costs and 24x7 support that meets your needs today and can change with them tomorrow.

We support you with an IT Service Process honed over 20 years of experience, designed to provide you with everything from the strategy and services to security to help desk support you need to thrive.

Industry-leading Expertise With Pricing You Can Predict

Technological expertise is just the beginning. Sunco takes the time to understand your business to design a managed IT services approach that provides you the uptime, business continuity, security and proactive support you need to succeed.

As a Microsoft Gold Partner we provide a full suite of IT solutions including network infrastructure, cloud solutions, backup and system data recovery, systems and device monitoring and maintenance, and operations reporting. Managed IT services designed to help your organization run efficiently so you can focus on your core business.

All at a fair, competitive and transparent price you can rely on.

We'll Help Increase Your Income

Typically, residents in long-term care facilities take care of their own Internet and phone needs. This is a lost revenue stream and frustration for families and residents. Sunco will help you create and provide a cost-effective option for your residents. Internet, TV, and phone service packages will be standardized across all facilities and your residents will not have to worry about setting up their own systems. Sunco can coordinate all required services with Telcos on your behalf plus train staff to administer.

Your Time is Valuable, Consider Simplified Communication Choices

The Sunco team can advise on three ways to help omit complexity with your telecom structure. First, we'll audit your network and phone bills to uncover cost savings and determine exactly what you're getting and for what price. Another consideration to remove complications is Sunco's Managed Services. An intelligent, cost-saving way to manage your property's mix of voice/data services. Finally, Sunco offers bundled pricing that incorporates all monthly communication costs, including hardware lease costs and phone lines, into one budget-friendly monthly payment. Enjoy your freedom and focus on your patients and residents.

We Believe in Meeting Your Changing Communication Needs

With Panasonic exiting the industry – It's time to upgrade and the options are endless. We offer the full range of phone systems - from basic to deluxe - by top manufacturers. Our team can help navigate the many features and models available to best meet your needs and budget.

So, Why Sunco?

We're dedicated to delivering the business telecom experience you deserve, and invested in your success from day one.

**We Make
Business Communication
Easier For You.**
